

NATIVE PLANTS

JOURNAL

vol. 12 | no. 1 | spring 2011

includes A GROWTH STAGE AND HEAT-UNIT MODEL

REFEREED RESEARCH

A growth stage and heat-unit model for *Hedysarum boreale* 4
Michael D Peel, Blair L Waldron, Ivan W Mott, and Scott Walker

REFEREED RESEARCH

Improved germination of two *Sphaeralcea* A. St.-Hil. (Malvaceae) 13
 species with scarification plus stratification treatments
Bruce Dunn

Scalping improves early growth of longleaf pine seedlings 18
David B South

Making a smoker to produce cellulose-based smoke for treating 27
 forest tree seeds
Ken Roeder, James West, and Bobby Smith

REFEREED RESEARCH

Tolerance of native wildflower species to postemergence herbicides 31
Jessica L Wiese, Elai N Keren, and Fabian D Menalled

Propagating shrub yellowroot (*Xanthorhiza simplicissima* Marsh.) 37
Kate Pawling

Perigynium removal improves seed germination in awl-fruit sedge 41
 (*Carex stipata*)
Nate Hough-Snee and Derrick D Cooper

REFEREED RESEARCH

Patterns of adaptation in three native grasses in northern California 45
Jay H Kitzmiller and Linnea Hanson

REFEREED RESEARCH

Prospects for conservation of an endemic woody species native 62
 to Florida, *Chionanthus pygmaeus* (pygmy fringetree), through seed
 and vegetative propagation
Amanda L Bayer and J Ryan Stewart

GERMPLASM RELEASE

Notice of release of Bonita Germplasm plains lovegrass: selected class 70
 of certified seed
Mary E Hershdorfer, Heather Dial, and Manuel Rosales

BOOK REVIEWS

Baboquivari Mountain Plants: Identification, Ecology, and Ethnobotany 74

Nursery Manual for Native Plants: A Guide for Tribal Nurseries,
