All papers undergo peer review.

Refereed research papers meet high scientific standards. General technical reports provide pragmatic information.

Authors are responsible for content and accuracy of their articles. All views and conclusions are those of the authors of the articles and not necessarily those of the editorial staff or the University of Wisconsin Press. Trade names are used for the information and convenience of the reader, and do not imply endorsement or preferential treatment by the University of Wisconsin or any other public agency. The University of Wisconsin is an equal opportunity and affirmative action employer and educational institution. *Native Plants Journal* publishes research involving pesticides, but such pesticides are not recommended. All uses of pesticides must be registered by appropriate state and/or federal agencies before they can be recommended. Pesticides can injure humans, domestic animals, desirable plants, and fish or other wildlife if improperly handled or applied. Read the pesticide label before purchasing, and use pesticides selectively and carefully. Follow label directions for disposal of surplus pesticides and pesticide containers.

CORRESPONDENCE

Manuscripts must be submitted via the Internet. See the first issue of each volume for complete author instructions or visit <http://npj.msubmit.net>. Address all subscription, business, back issue, bulk order, and advertising inquiries to:

University of Wisconsin Press Journals Division
1930 Monroe Street, 3rd Fl
Madison, WI 53711-2059 USA
608.263.0668 uwpress.wisc.edu/journals

SUBSCRIPTIONS

Subscription rates are:

Institutions
US\$ 200 print and electronic
US\$ 170 electronic only

Individuals
US\$ 70 print and electronic
US\$ 60 electronic only

Foreign postage is \$31.

PERMISSION TO REPRINT

No part of this publication may be reproduced, stored in a retrieval system, transmitted, or distributed, in any form, by any means electronic, mechanical, photographic, or otherwise, without the prior permission of the University of Wisconsin Press. For educational reprinting, please contact the Copyright Clearance Center (1.978.646.2600; 1.855.239.3415). For all other permissions, please contact permissions@uwpress.wisc.edu

PUBLISHING

Native Plants Journal is published 3 times each year (Apr, Aug, Dec) by the University of Wisconsin Press
ISSN 1522-8339 E-ISSN 1548-4785

I was recently reading an article written by John Upton and printed by Climate Central that described a fresh study report by Jon Christensen and others who were documenting the geographical movement of native plant species in California as influenced by global warming. Two conclusions emerged from this article. One is that many native plants are not migrating to better sites of adaptation as rapidly as the animals that are historically included within common habitat. This is rapidly creating a situation wherein community relationships will unravel, with unknown but probably deleterious consequences. The other conclusion is that invasive weed species are successfully migrating with climate shift and filling the holes in many habitats created by natives that are no longer fully adapted. We have much to learn about creating solutions to these significant environmental problems. Contributors to and readers of the *Native Plants Journal* are, to some degree or another, involved in research and the development of methodologies that may prove invaluable in assisting nature in resolving the serious issues that are unfolding within our world. Journals such as ours will be key in communicating the results of these research efforts, thus allowing us to create an atmosphere of scholarly symbiosis that will further drive efforts and improve chances for success. I laud your efforts and hope you continue your important work. We at the *Native Plants Journal* will continue to serve as a communication pipeline for your findings. By working together, I feel strongly that we can make a positive contribution to an increasingly disturbing problem.

Dr Stephen Love
Editor-in-Chief
