

REFEREED RESEARCH

- Ecology of *Asclepias brachystephana*: a plant for roadside and right-of-way management 256
Shaun M McCoshum and Anurag A Agrawal

- Improving Navajo spinach (*Cleome serrulata* Pursh) seed germination with cold stratification and hormone additions 268
Reagan C Wytsalucy, Daniel D Drost, Xin Dai, Brent L Black, and Grant E Cardon

- Propagation of pinyon pine: topworking *Pinus monophylla* to *Pinus edulis* rootstocks 280
Kylie M Lawson, Larry A Rupp, Youping Sun, and Robert Newhall

- Propagating selected *Pinus monophylla* accessions by grafting to *Pinus edulis* seedling rootstocks 293
Kylie M Lawson, Larry A Rupp, Youping Sun, Robert Newhall, and Chad Reid

- Effect of patch size on establishment and productivity of *Opuntia columbiana* 306
Steven O Link

- Conservation and re-establishment of Florida panhandle goldenasters (*Chrysopsis*): I. Reproduction characteristics and germination requirements 315
Natalie Hooton Graves, Gabriel Campbell-Martínez, Mack Thetford, Debbie Miller, and Sandra Wilson

- Conservation and re-establishment of Florida panhandle goldenasters (*Chrysopsis*): II. Growth and reproduction in response to fertilization within a coastal dune restoration context 323
Gabriel Campbell-Martínez, Mack Thetford, Debbie Miller, and Gina Mangold

GERMPLASM RELEASE

- Notice of release of Neches Germplasm splitbeard bluestem: a selected class of natural germplasm 335
R Alan Shadow and Melinda R Brakie

- Tober Germplasm Virginia wildrye: selected class of natural germplasm 341
Wayne Markegard, Wayne Duckwitz, and Nancy Jensen

PROPAGATION PROTOCOL

- Propagation of 14 native prairie forbs by sexual and asexual methods 345
Poonam Singh

- Micropropagation of New Jersey tea (*Ceanothus americanus*), sand cherry (*Prunus pumila*), and sweetbells (*Eubotrys racemosa*) 355
Jessica D Lubell-Brand and Mark H Brand
